MAKE SAVINGS RIGHT AT HOME

Less energy, more comfort

SWEPCO offers incentives toward energy-efficient home improvements like insulation, duct sealing, air conditioner or heat pump replacements, air infiltration, and more.

Start saving today.

1. Complete and submit the online form found at [SWEPCO.com/ARsaves](https://www.swepcoco.com/ARsaves) to reserve your incentive.
2. Schedule your selected upgrade(s) with a participating contractor.
3. Once your contractor submits the paperwork online, we'll mail your incentive check within 4–6 weeks.

IMAGINE THE ENERGY-SAVING POSSIBILITIES

Measure	Description	Pre-Upgrade Requirements	Incentive Potential
Attic and wall insulation	When combined with air sealing, added insulation can make your home more comfortable while reducing your heating and cooling costs up to 20 percent.	Your ceiling must be uninsulated or insulated with materials rated R-22 or less (about 6 inches or less).	\$0.12 to \$0.25 per square foot of ceiling insulation and \$0.15 per square foot of wall insulation
ENERGY STAR® certified windows	ENERGY STAR certified windows offer two panes of insulated glass, special coatings that reflect infrared light, and gas-filled window panes that reduce heat transfer, increasing your comfort.	Your home must be equipped with clear windows that are not made of low-e glass.	\$30 per window, \$80 for sliding glass doors, and \$40 for half-lite doors
Air sealing	During an air sealing service, SWEPCO's qualified contractors use diagnostic testing equipment to identify and properly seal air leaks, which helps save energy.	Air sealing must have the potential to reduce air leakage in your home by 20 percent or more.	Up to \$300
Air conditioner or heat pump replacement	If your heating and cooling system is more than 15 years old, you could reduce your energy costs by hundreds of dollars per year when you install a new high-efficiency heating and cooling system.	Existing equipment must be 13 SEER or less.	\$75 to \$2,500 per system
Duct sealing	Engaging SWEPCO's qualified contractors to evaluate your duct system, seal leaks, and repair can greatly improve home comfort and reduce your heating and cooling costs by as much as 20 percent.	Ducts must have at least 10 percent leakage prior to duct sealing.	Up to \$400 per system
ENERGY STAR hybrid water heaters	New ENERGY STAR hybrid water heaters can be 2-3 times more efficient than a standard electric water heater.	Electric water heater	\$500 per unit
ENERGY STAR smart thermostats	A new smart thermostat is the smart choice to controlling your heating and cooling system. Whether it's learning your temperature preferences or adjusting the air from your smart phone, the savings add up.	No existing smart thermostat	\$75 per qualified model
CoolSaver A/C Tune-up	This advanced A/C tune-up is more than your typical tune-up, improving your system's performance by as much as 30 percent. That saves you money, keeps you cool, and extends the life of your equipment.	Central air conditioner system 1 year old or older	Up to \$200 discount on the service

What SWEPCO customers are saying:

"As a result of my energy-efficient upgrades, I felt an immediate difference. The duct sealing and air sealing really helped with the comfort level in my home. This is a wonderful service!"

- Bonnie F., Homeowner
