

BACK-TO-SCHOOL SAVINGS

Prairie Grove School District

Learning new ways to save

From kindergarten to high school, Prairie Grove School District is always looking for new ways to better serve its students. The district partnered with SWEPCO to upgrade its administration and school facilities with new, energy-efficient equipment.

Upgrades that make the grade

Working closely with SWEPCO's energy efficiency team, Prairie Grove School District undertook a district-wide initiative to replace all the interior and exterior lighting fixtures with long-lasting, energy-efficient LEDs. The upgrades didn't stop there. Taking advantage of additional SWEPCO incentives, the district also benefited from CoolSaver A/C Tune-ups, PC power management software, smart thermostats, and more.

Savings at the top of the class

After five years of ongoing improvements, Prairie Grove School District's annual estimated energy savings now top 1.2 million kWh. The district also received over \$165,000 in SWEPCO incentives, significantly offsetting the cost of the upgrades. In addition to cost savings, the improvements have also had a positive impact on student comfort, safety, and productivity.
