

EFFICIENCY BY THE PEOPLE, FOR THE PEOPLE

Washington County, Arkansas

A partnership that pays off

Situated in beautiful Northwest Arkansas, Washington County is home to rolling hills, rugged mountains, a national forest and over 200,000 people. Starting in 2013, county officials teamed up with SWEPCO to overhaul the county's many office spaces, courthouses, healthcare facilities, and other various buildings with new energy-efficient upgrades.

47 projects and counting

Washington County has completed 47 energy efficiency projects, including LED upgrades in all county buildings, high-efficiency HVAC replacements, and CoolSaver A/C Tune-ups. Through it all, the SWEPCO team was there to provide recommendations and facilitate the massive undertaking in any way they could.

Countywide savings

Altogether, the upgrades have saved Washington County well over 1.3 million kWh. The lighting and HVAC enhancements have also improved safety and comfort at each of the upgraded facilities. To help make it all possible, SWEPCO has provided the county with incentives totalling over \$178,000.
